

- Extend `audio_tag` and `video_tag` to accept Active Storage attachments.

Now it's possible to write

```
audio_tag(user.audio_file)
video_tag(user.video_file)
```

Instead of

```
audio_tag(polymorphic_path(user.audio_file))
video_tag(polymorphic_path(user.video_file))
```

`image_tag` already supported that, so this follows the same pattern.

*Matheus Richard*

- Ensure models passed to `form_for` attempt to call `to_model`.
