

## Setup

- Execute `npm i --prefix test` from root folder

## Run

You can run the unit tests in two environments:

- Node.js: Execute `npm run test-unit` from root folder
- Browser: Execute `npm start` (or run any other local web sever) from root folder and access `http://localhost:8080/test/unit/UnitTests.html` on web browser. (See How to run things locally)
