

Contributing

We would love to have people submit pull requests and help make `grpc-ecosystem/go-grpc-middleware` even better 🙌.

Fork, then clone the repo:

```
git clone git@github.com:your-username/go-grpc-middleware.git
```

Before checking in please run the following:

```
make all
```

This will `vet` , `fmt` , regenerate documentation and run all tests.

Push to your fork and open a pull request.
