

Example app with absolute imports

This example shows how to configure Babel to have absolute imports instead of relative imports without modifying the Webpack configuration.

Deploy your own

Deploy the example using [Vercel](#) or preview live with [StackBlitz](#)

How to use

Execute `create-next-app` with [npm](#) or [Yarn](#) to bootstrap the example:

```
npx create-next-app --example with-absolute-imports with-absolute-imports-app
# or
yarn create next-app --example with-absolute-imports with-absolute-imports-app
# or
pnpm create next-app -- --example with-absolute-imports with-absolute-imports-app
```

Deploy it to the cloud with [Vercel](#) ([Documentation](#)).
