

Example app with Storybook

This example shows a default set up of Storybook using [storybook-addon-next](#). Included in this example are stories that demonstrate the ability to use Next.js features in Storybook.

TypeScript

As of v6.0, Storybook has built-in TypeScript support, so no configuration is needed. If you want to customize the default configuration, refer to the [TypeScript docs](#).

Deploy your own

Deploy the example using [Vercel](#) or preview live with [StackBlitz](#)

How to use

Execute [create-next-app](#) with [npm](#) or [Yarn](#) to bootstrap the example:

```
npx create-next-app --example with-storybook with-storybook-app
# or
yarn create next-app --example with-storybook with-storybook-app
# or
pnpm create next-app -- --example with-storybook with-storybook-app
```

Run Storybook

```
npm run storybook
# or
yarn storybook
```

Build Static Storybook

```
npm run build-storybook
# or
yarn build-storybook
```

You can use [Vercel](#) to deploy Storybook. Specify `storybook-static` as the output directory.
