

Prevent import subsystem stack frames from being counted by the `warnings.warn(stacklevel=)` parameter.

Prevent `__class__` assignment to immutable built-in objects.

Fix AST compilation for [PEP 448](#) syntax.

`time.strftime()` buffer over-read.

To resolve a compatibility problem found with `py2exe` and `pywin32`, `imp.load_dynamic()` once again ignores previously loaded modules to support Python modules replacing themselves with extension modules. Patch by Petr Viktorin.

Fixed a bug in `typing.py` where `isinstance([], typing.Iterable)` would return `True` once, then `False` on subsequent calls.

Fixed buffer overread in `BytesIO.readline()` if a position is set beyond size. Based on patch by John Leitch.

Fix overrun error in `deque.index()`. Found by John Leitch and Bryce Darling.
