

## PageEventObject interface

Denotes the objects received by callback functions for page events.

See [PageEmittedEvents](#) for more detail on the events and when they are emitted.

**Signature:**

```
export interface PageEventObject
```

## Properties

Property	Type	Description
<a href="#">close</a>	never	
<a href="#">console</a>	<a href="#">ConsoleMessage</a>	
<a href="#">dialog</a>	<a href="#">Dialog</a>	
<a href="#">domcontentloaded</a>	never	
<a href="#">error</a>	Error	
<a href="#">frameattached</a>	<a href="#">Frame</a>	
<a href="#">framedetached</a>	<a href="#">Frame</a>	
<a href="#">framenavigated</a>	<a href="#">Frame</a>	
<a href="#">load</a>	never	
<a href="#">metrics</a>	{ title: string; metrics: <a href="#">Metrics</a> ; }	
<a href="#">pageerror</a>	Error	
<a href="#">popup</a>	<a href="#">Page</a>	
<a href="#">request</a>	<a href="#">HTTPRequest</a>	
<a href="#">requestfailed</a>	<a href="#">HTTPRequest</a>	
<a href="#">requestfinished</a>	<a href="#">HTTPRequest</a>	
<a href="#">requestsservedfromcache</a>	<a href="#">HTTPRequest</a>	
<a href="#">response</a>	<a href="#">HTTPResponse</a>	
<a href="#">workercreated</a>	<a href="#">WebWorker</a>	
<a href="#">workerdestroyed</a>	<a href="#">WebWorker</a>
