

Analyzer Bundles example

This example shows how to analyze the output bundles using [@next/bundle-analyzer](#)

Deploy your own

Deploy the example using [Vercel](#) or preview live with [StackBlitz](#)

How to use

Execute [create-next-app](#) with [npm](#) or [Yarn](#) to bootstrap the example:

```
npx create-next-app --example analyze-bundles analyze-bundles-app
# or
yarn create next-app --example analyze-bundles analyze-bundles-app
# or
pnpm create next-app -- --example analyze-bundles analyze-bundles-app
```

Analyze webpack output

To analyze your webpack output, invoke the following command:

```
npm run analyze
# or
yarn analyze
```

Once the build is completed, you can inspect the bundle by running:

```
npm run serve
# or
yarn serve
```
