

Basic export example

This example shows the most basic usage of `next export`. Without `exportPathMap`.

Deploy your own

Deploy the example using [Vercel](#) or preview live with [StackBlitz](#)

How to use

Execute `create-next-app` with [npm](#) or [Yarn](#) to bootstrap the example:

```
npx create-next-app --example basic-export basic-export-app
# or
yarn create next-app --example basic-export basic-export-app
# or
pnpm create next-app -- --example basic-export basic-export-app
```

Deploy it to the cloud with [Vercel](#) ([Documentation](#)).
