

is-decimal

build **passing**

coverage **100%**

downloads **31M/month**

minzipped size **216 B**

Check if a character is decimal.

Install

[npm](#):

```
npm install is-decimal
```

Use

```
var decimal = require('is-decimal')

decimal('0') // => true
decimal('9') // => true
decimal('a') // => false
decimal('💩') // => false
```

API

decimal(character | code)

Check whether the given character code (`number`), or the character code at the first position (`string`), is decimal.
