

Another Blog Post with Code Example Including Highlighted Lines

2017-10-17T14:12:03.284Z

This post contains the same code snippet with syntax highlighting from the previous post, but now includes highlighted lines. The highlight theme is still same one used in the official React documentation.

```
function NumberList(props) {  
  // highlight-line  
  const numbers = props.numbers  
  const listItems = numbers.map(number => (  
    // highlight-start  
    <li key={number.toString()}>{number}</li>  
  ))  
  // highlight-end  
  return <ul>{listItems}</ul>  
}  
  
const numbers = [1, 2, 3, 4, 5]  
ReactDOM.render(  
  <NumberList numbers={numbers} />,  
  document.getElementById("root")  
)
```
