

react-helmet example

This is a minimalistic example of how to combine next.js and [react-helmet](#). The title of the page shall be changed to "Hello next.js!" If you go to the page `/about`, the title will be overridden to "About | Hello next.js!" The rest is all up to you.

Deploy your own

Deploy the example using [Vercel](#) or preview live with [StackBlitz](#)

How to use

Execute `create-next-app` with [npm](#) or [Yarn](#) to bootstrap the example:

```
npx create-next-app --example with-react-helmet with-react-helmet-app
# or
yarn create next-app --example with-react-helmet with-react-helmet-app
# or
pnpm create next-app -- --example with-react-helmet with-react-helmet-app
```

Deploy it to the cloud with [Vercel](#) ([Documentation](#)).
