

zh-CN

列偏移。

使用 `offset` 可以将列向右侧偏。例如，`offset={4}` 将元素向右侧偏移了 4 个列 (column) 的宽度。

en-US

`offset` can set the column to the right side. For example, using `offset = {4}` can set the element shifted to the right four columns width.

```
import { Row, Col } from 'antd';

export default () => (
  <>
    <Row>
      <Col span={8}>col-8</Col>
      <Col span={8} offset={8}>
        col-8
      </Col>
    </Row>
    <Row>
      <Col span={6} offset={6}>
        col-6 col-offset-6
      </Col>
      <Col span={6} offset={6}>
        col-6 col-offset-6
      </Col>
    </Row>
    <Row>
      <Col span={12} offset={6}>
        col-12 col-offset-6
      </Col>
    </Row>
  </>
);
```
