

npm-stop

Synopsis

```
npm stop [-- <args>]
```

Description

This runs a predefined command specified in the “stop” property of a package’s “scripts” object.

Unlike with `npm start`, there is no default script that will run if the “stop” property is not defined.

Example

```
{
  "scripts": {
    "stop": "node bar.js"
  }
}
```

```
npm stop
```

```
> npm@x.x.x stop
> node bar.js
```

(bar.js output would be here)

Configuration

ignore-scripts

- Default: false
- Type: Boolean

If true, npm does not run scripts specified in package.json files.

Note that commands explicitly intended to run a particular script, such as `npm start`, `npm stop`, `npm restart`, `npm test`, and `npm run-script` will still run their intended script if `ignore-scripts` is set, but they will *not* run any pre- or post-scripts.

script-shell

- Default: `/bin/sh` on POSIX systems, `cmd.exe` on Windows
- Type: null or String

The shell to use for scripts run with the `npm exec`, `npm run` and `npm init <pkg>` commands.
