Working with Grafana dashboard UI

The dashboard UI has the following sections to allow you to customize the presentation of data.

- **Zoom out time range** (1)
- **Time picker dropdown** (2). Access relative time range options, auto refresh options and set custom absolute time ranges.
- **Manual refresh option** (3) Fetch new data.
- **Dashboard panel** (4) Click the panel title to edit panels.
- **Graph legend** (5) Change series colors, y-axis and series visibility directly from the legend.

For more details, see [Dashboard header]({{< relref "/dashboard-header.md" >}}) and [Dashboard rows]({{< relref "/dashboard-row.md" >}}).
