

Gatsby minimal TypeScript starter

Quick start

1. Create a Gatsby site.

Use the Gatsby CLI to create a new site, specifying the minimal TypeScript starter.

```
# create a new Gatsby site using the minimal TypeScript starter
npm init gatsby
```

2. Start developing.

Navigate into your new site's directory and start it up.

```
cd my-gatsby-site/
npm run develop
```

3. Open the code and start customizing!

Your site is now running at <http://localhost:8000>!

Edit `src/pages/index.tsx` to see your site update in real-time!
