

# is-alphabetical

build **passing** coverage **100%** downloads **32M/month** minzipped size **231 B**

Check if a character is alphabetical.

## Install

[npm](#):

```
npm install is-alphabetical
```

## Use

```
var alphabetical = require('is-alphabetical')

alphabetical('a') // => true
alphabetical('B') // => true
alphabetical('0') // => false
alphabetical('🐞') // => false
```

## API

**alphabetical(character | code)**

Check whether the given character code ( `number` ), or the character code at the first position ( `string` ), is alphabetical.
