

# term - utilities for dealing with terminals

 Test passing  reference  go report A+

term provides structures and helper functions to work with terminal (state, sizes).

## Using term

```
package main

import (
    "log"
    "os"

    "github.com/moby/term"
)

func main() {
    fd := os.Stdin.Fd()
    if term.IsTerminal(fd) {
        ws, err := term.GetWinsize(fd)
        if err != nil {
            log.Fatalf("term.GetWinsize: %s", err)
        }
        log.Printf("%d:%d\n", ws.Height, ws.Width)
    }
}
```
