

# zeus plugin

[Zeus](#) preloads your Rails environment and forks that process whenever needed. This effectively speeds up Rails' boot process to under 1 sec. This plugin adds autocompletion for zeus and aliases for common usage.

To use it, add `zeus` to the plugins array in your zshrc file:

```
plugins=(... zeus)
```

You also need to have the `zeus` gem installed.

Alias	Command
<i>zi</i>	zeus init
<i>zinit</i>	zeus init
<i>zs</i>	zeus start
<i>zstart</i>	zeus start
<i>zc</i>	zeus console
<i>zconsole</i>	zeus console
<i>zsr</i>	zeus server
<i>zerver</i>	zeus server
<i>zr</i>	noglob zeus rake
<i>zake</i>	noglob zeus rake
<i>zg</i>	zeus generate
<i>zenerate</i>	zeus generate
<i>zrn</i>	zeus runner
<i>zunner</i>	zeus runner
<i>zcu</i>	zeus cucumber
<i>zucumber</i>	zeus cucumber
<i>zwip</i>	zeus cucumber --profile wip
<i>zspec</i>	zeus rspec
<i>zt</i>	zeus test
<i>zest</i>	zeus test
<i>zu</i>	zeus test test/unit/*
<i>zunits</i>	zeus test test/unit/*
<i>zf</i>	zeus test test/functional/*

<i>zfunctional</i>	zeus test test/functional/*
<i>za</i>	zeus test test/unit/*; zeus test test/functional/; zeus cucumber
<i>zall</i>	zeus test test/unit/*; zeus test test/functional/; zeus cucumber
<i>zsw</i>	rm .zeus.sock
<i>zweep</i>	rm .zeus.sock
<i>zdb</i>	zeus rake db:reset db:test:prepare
<i>zdbreset</i>	zeus rake db:reset db:test:prepare
