

Reason Relay Example

[Reason Relay](#).

This example relies on [Prisma + Nexus](#) for its GraphQL backend.

Deploy your own

Deploy the example using [Vercel](#):

How to use

Execute `create-next-app` with [npm](#) or [Yarn](#) to bootstrap the example:

```
npx create-next-app --example with-reason-relay with-reason-relay-app
# or
yarn create next-app --example with-reason-relay with-reason-relay-app
# or
pnpm create next-app -- --example with-reason-relay with-reason-relay-app
```

Download schema introspection data from configured Relay endpoint:

```
npm run schema
# or
yarn schema
```

Run Relay ahead-of-time compilation (should be re-run after any edits to components that query data with Relay)

```
npm run relay
# or
yarn relay
```

Build and run the Relay project

```
npm run build
npm run dev
# or
yarn build
yarn dev
```

Deploy it to the cloud with [Vercel](#) ([Documentation](#)).
