

Install sharp to Use Built-In Image Optimization

Why This Error Occurred Using Next.js' built-in Image Optimization requires sharp as a dependency.

You are seeing this error because your OS was unable to install sharp properly, either using pre-built binaries or building from source.

Possible Ways to Fix It Option 1: Use a different version of Node.js and try to install **sharp** again.

```
npm i sharp
```

```
# or
```

```
yarn add sharp
```

Option 2: If using macOS, ensure XCode Build Tools are installed and try to install **sharp** again.

For example, see macOS Catalina instructions.

Option 3: Use a different OS and try to install **sharp** again.

For example, if you're using Windows, try using WSL (Windows Subsystem for Linux).
