

# Tailwind CSS example

## How to use

Download the example [or clone the repo](#):

```
curl https://codeload.github.com/mui/material-ui/tar.gz/master | tar -xz --strip=2
material-ui-master/examples/tailwind-css
cd tailwind-css
```

Install it and run:

```
npm install
npm start
```

or:

Edit on CodeSandbox

Open in StackBlitz

## The idea behind the example

This example demonstrates how you can use [Tailwind CSS](#) and [Create React App](#) together with MUI. It includes `@mui/material` and its peer dependencies, including `emotion`, the default style engine in MUI v5.

## What's next?

You now have a working example project. You can head back to the documentation, continuing browsing it from the [templates](#) section.
