

Home > puppeteer > Coverage > startJSCoverage

Coverage.startJSCoverage() method

Signature:

```
startJSCoverage(options?: JSCoverageOptions): Promise<void>;
```

Parameters

Parameter	Type	Description
options	JSCoverageOptions	Set of configurable options for coverage defaults to resetOnNavigation : true, reportAnonymousScripts : false

Returns:

Promise<void>

Promise that resolves when coverage is started.

Remarks

Anonymous scripts are ones that don't have an associated url. These are scripts that are dynamically created on the page using `eval` or `new Function`. If `reportAnonymousScripts` is set to `true`, anonymous scripts will have `__puppeteer_evaluation_script__` as their URL.
