

Custom Routes must return an array

Why This Error Occurred

When defining custom routes an array wasn't returned from either `headers` , `rewrites` , or `redirects` .

Possible Ways to Fix It

Make sure to return an array that contains the routes.

Before

```
// next.config.js
module.exports = {
  async rewrites() {
    return {
      source: '/feedback',
      destination: '/feedback/general',
    }
  },
}
```

After

```
module.exports = {
  async rewrites() {
    return [
      {
        source: '/feedback',
        destination: '/feedback/general',
      },
    ],
  },
}
```
