

Guava Release 08: Release Notes

Release 08 was released on January 27, 2011. (See [ReleaseHistory](#).)

Download it

Javadocs are included, but more complete javadocs (using the “-linksource” and “-use” javadoc options) are always available on-line:

Using Guava in your project

Here are some code/config snippets for how to UseGuavaInYourBuild.

This release is identified in the Maven “central” repository used by maven, ivy, gradle, ant (with maven ant tasks) as `com.google.guava:guava:r08`. (Note: the GWT artifact is not yet released to the maven central repository. Stay tuned.)

API Changes

[Full JDiff Report of changes since release 07](#)

To build a combined report of the API changes between release 08 and any older release, check out our source tree and run `svn/tags/release08/javadoc/jdiff/jdiff.sh` with the previous release number as argument (example: `jdiff.sh 05`).
