Introduction to Grafana

Grafana is a complete observability stack that allows you to monitor and analyze metrics, logs and traces. It allows you to query, visualize, alert on and understand your data no matter where it is stored. Create, explore, and share beautiful dashboards with your team and foster a data driven culture. For more information, refer to Grafana overview. Our observability stack has the following products and components.

{{< docs/shared "basics/what-is-grafana.md" >}}
