

grunt plugin

This plugin adds completions for [grunt](#).

To use it, add `grunt` to the plugins array of your `.zshrc` file:

```
plugins=(... grunt)
```

Enable caching

If you want to use the cache, set the following in your `.zshrc`:

```
zstyle ':completion:*' use-cache yes
```

Settings

- Show grunt file path:

```
zstyle ':completion::complete:grunt::options:' show_grunt_path yes
```

- Cache expiration days (default: 7):

```
zstyle ':completion::complete:grunt::options:' expire 1
```

- Not update options cache if target gruntfile is changed.

```
zstyle ':completion::complete:grunt::options:' no_update_options yes
```

Note that if you change the zstyle settings, you should delete the cache file and restart zsh.

```
$ rm ~/.zcompcache/grunt
$ exec zsh
```
