A list of plugins that don't come bundled with Oh My Zsh

There is no restriction for adding your plugin into zsh bundle (unlike [themes](#)) but the rationale for creating this page is next:

- sometimes you're not really sure if your plugin will not harm (e.g. it can break something).

Installation

It should be clear from [this](#).

The plugins

Custom git plugin

Fixes some inconsistencies in the default git plugin that make the aliases more intuitive, while adding some other useful functions.

You can get it from [here](#).

Git auto status

If you found yourself constantly typing `git status` after bunch of commands like `git commit` and you want to avoid that, then this plugin is for you.

This plugin is a nice addition to **git_prompt_status**.

You can get it from [here](#).

History Sync

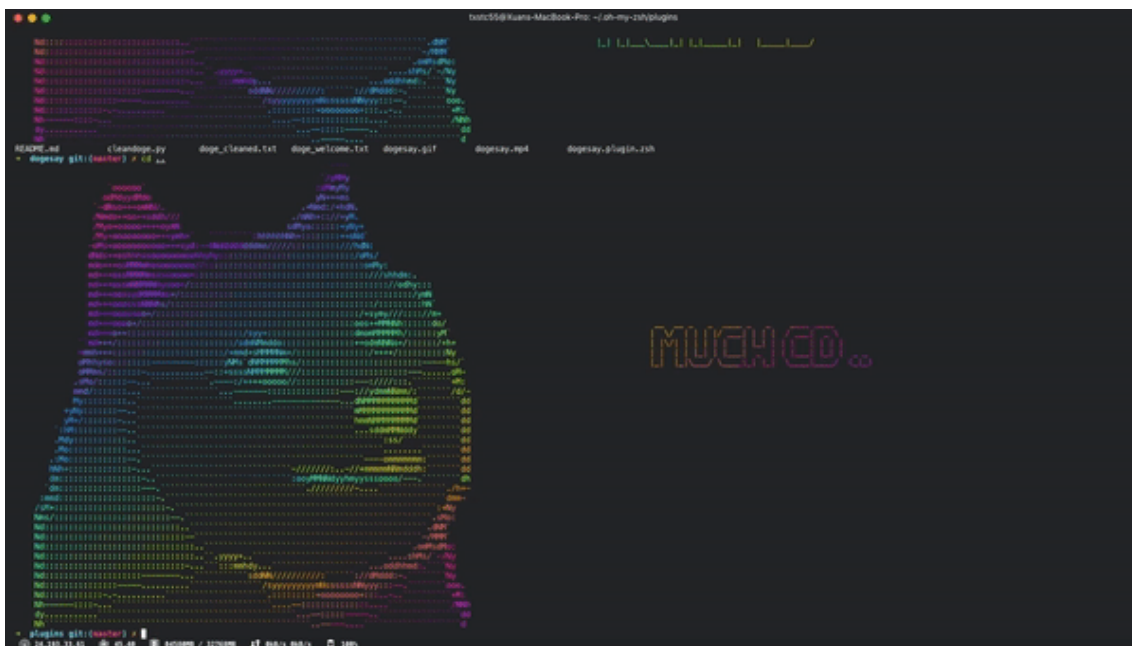

GPG encrypted, Internet synchronized Zsh history using Git.

You can get it from [here](#).

Doge Say

Get a doge to repeat every command you put in!

See it in action:

And get your doge [here](#).

fz

Give tab-completions to `z`.

Get it [here](#).

aterminal
