为点状步骤条增加自定义展示。

en-US

You can customize the display for Steps with progress dot style.

```
import { Steps, Popover } from 'antd';

const { Step } = Steps;

const customDot = (dot, { status, index }) => (
  <Popover
    content={
      <span>
        step {index} status: {status}
      </span>
    }
  >
    {dot}
  </Popover>
);

export default () => (
  <Steps current={1} progressDot={customDot}>
    <Step title="Finished" description="You can hover on the dot." />
    <Step title="In Progress" description="You can hover on the dot." />
    <Step title="Waiting" description="You can hover on the dot." />
    <Step title="Waiting" description="You can hover on the dot." />
  </Steps>
);
```
