

gatsby-plugin-twitter

Loads the Twitter JavaScript for embedding tweets, timelines, share and follow buttons. Lets you add tweets to markdown and in other places.

Install

```
npm install gatsby-plugin-twitter
```

Configure

```
// In your gatsby-config.js
plugins: [`gatsby-plugin-twitter`]
```

How to Use

1. On Twitter, find the tweet you'd like to display.
2. In the top right-hand corner of the tweet, click the caret (v) and select "Embed tweet".
3. Take the code you're given and copy it into your markdown page.

*Note: when copying the embed code, copy **only** the blockquote section and not the script.*
