

# Example app with next-sass

This example demonstrates how to use Next.js' built-in Global Sass/Scss imports and Component-Level Sass/Scss modules support.

## Deploy your own

Deploy the example using [Vercel](#) or preview live with [StackBlitz](#)

## How to use

Execute `create-next-app` with [npm](#) or [Yarn](#) to bootstrap the example:

```
npx create-next-app --example with-next-sass with-next-sass-app
# or
yarn create next-app --example with-next-sass with-next-sass-app
# or
pnpm create next-app -- --example with-next-sass with-next-sass-app
```

Run production build with:

```
npm run build
npm run start
# or
yarn build
yarn start
```

Deploy it to the cloud with [Vercel](#) ([Documentation](#)).
