

Example app with [linaria](#)

This example features how to use [linaria](#) as the styling solution instead of [styled-jsx](#).

We are creating three `div` elements with custom styles being shared across the elements. The styles includes the use of pseudo-selector and CSS animations.

Deploy your own

Deploy the example using [Vercel](#) or preview live with [StackBlitz](#)

How to use

Execute [create-next-app](#) with [npm](#) or [Yarn](#) to bootstrap the example:

```
npx create-next-app --example with-linaria with-linaria-app
# or
yarn create next-app --example with-linaria with-linaria-app
# or
pnpm create next-app -- --example with-linaria with-linaria-app
```

Deploy it to the cloud with [Vercel](#) ([Documentation](#)).
