

zh-CN

聚焦额外配置属性。

en-US

Focus with additional option.

```
import { Input, Space, Button, Switch } from 'antd';

const Demo = () => {
  const inputRef = React.useRef<any>(null);
  const [input, setInput] = React.useState(true);

  const sharedProps = {
    style: { width: '100%' },
    defaultValue: 'Ant Design love you!',
    ref: inputRef,
  };

  return (
    <Space direction="vertical" style={{ width: '100%' }}>
      <Space wrap>
        <Button
          onClick={() => {
            inputRef.current!.focus({
              cursor: 'start',
            });
          }}
        >
          Focus at first
        </Button>
        <Button
          onClick={() => {
            inputRef.current!.focus({
              cursor: 'end',
            });
          }}
        >
          Focus at last
        </Button>
        <Button
          onClick={() => {
            inputRef.current!.focus({
              cursor: 'all',
            });
          }}
        >
          Focus to select all
        </Button>
        <Button
```

```

        onClick={() => {
            inputRef.current!.focus({
                preventScroll: true,
            });
        }}
    >
        Focus prevent scroll
    </Button>
    <Switch
        checked={input}
        checkedChildren="Input"
        uncheckedChildren="TextArea"
        onChange={() => {
            setInput(!input);
        }}
    />
</Space>
<br />
{input ? <Input {...sharedProps} /> : <Input.TextArea {...sharedProps} />}
</Space>
);
};

export default () => <Demo />;

```
