

Rewriting to Auto Export or Fallback Dynamic Route

Why This Error Occurred

One of your rewrites in your `next.config.js` point to a [dynamic route](#) that is automatically statically optimized or is a [fallback SSG page](#).

Rewriting to these pages are not yet supported since rewrites are not available client-side and the dynamic route params are unable to be parsed. Support for this may be added in a future release.

Possible Ways to Fix It

For fallback SSG pages you can add the page to the list of [prerendered paths](#).

For static dynamic routes, you will currently need to either rewrite to non-dynamic route or opt the page out of the static optimization with [getServerSideProps](#)
