

7.3.0-beta1 (2020-10-15)

Features / Enhancements

- **NamedColors**: Named colors refactors. #28235, @torkelo

7.2.0 (2020-09-23)

Features / Enhancements

- **grafana/ui**: Do not bundle jQuery. #27667, @kennytm

7.1.0-beta1 (2020-07-01)

Features / Enhancements

- **Grafana-UI**: Add FileUpload. #25835, @Clarity-89
- **Switch**: Deprecate checked prop in favor of value. #25862, @tskarhed

7.0.4 (2020-06-25)

Features / Enhancements

- **Slider**: Update rc-slider dependency to 9.3.1. #25617, @torkelo

7.0.0 (2020-05-18)

Bug Fixes

- **Explore**: Fixes loading more logs in logs context view. #24135, @Estrax

7.0.0-beta3 (2020-05-08)

Features / Enhancements

- **Forms**: Remove Forms namespace [BREAKING]. Will cause all **Forms** imports to stop working. See migration guide below. #24378, @tskarhed

7.0.0-beta.2 (2020-05-07)

Bug Fixes

- **Dashboard**: Fix for folder picker menu not being visible outside modal when saving dashboard. #24296, @tskarhed
- **Select**: Fixes so component loses focus on selecting value or pressing outside of input. #24008, @mckn

7.0.0-beta.1 (2020-04-28)

Breaking changes

@grafana/ui forms migration notice

In Grafana 7 we have migrated from our old form components to **LegacyForms** namespace. The new components were previously available under the **Forms** namespace.

All the following components were moved to the **LegacyForms** namespace, and some replaced with the new form components:

- SecretFormField
- FormField
- Select
- AsyncSelect
- IndicatorsContainer
- NoOptionsMessage
- ButtonSelect
- Input
- Switch

One exception to this is **FormLabel**, which has been renamed to **InlineFormLabel**.

If you were previously using the legacy form styles and your plugin is breaking, change from this:

```
import { Switch } from '@grafana/ui';  
...  
<Switch .../>
```

To this:

```
import { LegacyForms } from '@grafana/ui';  
...  
<LegacyForms.Switch ... />
```

If you were previously using the new form styles under the **Forms** namespace, change from this:

```
import { Forms } from '@grafana/ui';  
...  
<Forms.Switch ... />
```

To this:

```
import { Switch } from '@grafana/ui';  
...  
<Switch ... />
```

To see the new form components visit our [Storybook](#)

Create custom value with Select

Previously the only thing you had to do to enable creating a custom value with Select was to add the `allowCustomValue` prop. Now you also have to add a `onCreateOption` handler.

Before:

```
import { Select } from '@grafana/ui';
...
<Select
  ...
  allowCustomValue
/>
```

After:

```
import { Select } from '@grafana/ui';
...
<Select
  ...
  allowCustomValue
  onCreateOption={(customValue) => {
    // Do things with the customValue
  }}
/>
```

Features / Enhancements

- **@grafana/ui:** Create Icon component and replace icons. #23402, @ivanahuckova
- **@grafana/ui:** Create slider component. #22275, @ivanahuckova
- **@grafana/ui:** Remove ColorPalette component. #23592, @ivanahuckova
- **Components:** IconButton. #23510, @torkelo
- **Docs:** Adding API reference documentation support for the packages libraries. #21931, @mckn
- **Migration:** Add old Input to legacy namespace. #23286, @tskarhed
- **Migration:** Final components to LegacyForms. #23707, @tskarhed
- **Migration:** Move Switch from Forms namespace. #23386, @tskarhed
- **Migration:** Move last components from Forms namespace. #23556, @tskarhed
- **Migration:** Remove Button from Forms namespace. #23105, @tskarhed
- **Migration:** TextArea from Forms namespace. #23436, @tskarhed
- **grafana/ui:** Add basic horizontal and vertical layout components. #22303, @dprokop

Bug Fixes

- **@grafana/ui**: Fix time range when only partial datetime is provided. #23122, @ivanahuckova

6.6.0-beta.1.0 (2020-01-20)

Features / Enhancements

- **Forms**: introduce RadioButtonGroup. #20828, @dprokop
- **grafana/ui**: ConfirmModal component. #20965, @alexanderzobnin
- **grafana/ui**: Create Tabs component. #21328, @peterholmberg
- **grafana/ui**: New table component. #20991, @peterholmberg
- **grafana/ui**: New updated time picker. #20931, @mckn

Bug Fixes

- **API**: Optionally list expired API keys. #20468, @papagian
- **grafana/ui**: Do not build grafana/ui in strict mode as it depends on non-strict libs. #21319, @dprokop

6.0.0-alpha.0 (2019-02-22)

Version update to 6.0.0 to keep @grafana/ui version in sync with Grafana

1.0.0-alpha.0 (2019-02-21)

First public release
