

zh-CN

方便的从数组生成 Checkbox 组。

en-US

Generate a group of checkboxes from an array.

```
import { Checkbox } from 'antd';

function onChange(checkedExceptions) {
  console.log('checked = ', checkedValues);
}

const plainOptions = ['Apple', 'Pear', 'Orange'];
const options = [
  { label: 'Apple', value: 'Apple' },
  { label: 'Pear', value: 'Pear' },
  { label: 'Orange', value: 'Orange' },
];

const optionsWithDisabled = [
  { label: 'Apple', value: 'Apple' },
  { label: 'Pear', value: 'Pear' },
  { label: 'Orange', value: 'Orange', disabled: false },
];

export default () => (
  <>
    <Checkbox.Group options={plainOptions} defaultValue={['Apple']} onChange=
{onChange} />
    <br />
    <br />
    <Checkbox.Group options={options} defaultValue={['Pear']} onChange={onChange} />
    <br />
    <br />
    <Checkbox.Group
      options={optionsWithDisabled}
      disabled
      defaultValue={['Apple']}
      onChange={onChange}
    />
  </>
);
```
