

[Home](#) > [puppeteer](#) > [ElementHandle](#) > [click](#)

## ElementHandle.click() method

This method scrolls element into view if needed, and then uses [Page.mouse](#) to click in the center of the element. If the element is detached from DOM, the method throws an error.

### Signature:

```
click(options?: ClickOptions): Promise<void>;
```

### Parameters

Parameter	Type	Description
options	<a href="#">ClickOptions</a>	

### Returns:

Promise<void>
