Tracing class

The Tracing class exposes the tracing audit interface.

Signature:

```
export declare class Tracing
```

Remarks

You can use `tracing.start` and `tracing.stop` to create a trace file which can be opened in Chrome DevTools or timeline viewer.

The constructor for this class is marked as internal. Third-party code should not call the constructor directly or create subclasses that extend the `Tracing` class.

Example

```
await page.tracing.start({path: 'trace.json'});
await page.goto('https://www.google.com');
await page.tracing.stop();
```

Properties

Property	Modifiers	Type	Description
<code>_client</code>		CDPSession	
<code>_path</code>		string	
<code>_recording</code>		boolean	

Methods

Method	Modifiers	Description
<code>start(options)</code>		Starts a trace for the current page.
<code>stop()</code>		Stops a trace started with the start method.
