

This error indicates that there is a mismatch between generic parameters and impl Trait parameters in a trait declaration versus its impl.

```
trait Foo {  
    fn foo(&self, _: &impl Iterator);  
}  
impl Foo for () {  
    fn foo<U: Iterator>(&self, _: &U) { } // error method `foo` has incompatible  
                                           // signature for trait  
}
```
