

Firewalld Plugin

This plugin adds some aliases and functions for Firewalld using the `firewalld-cmd` command. To use it, add `firewalld` to your `plugins` array.

```
plugins=(... firewalld)
```

Aliases

Alias	Command	Description
fw	<code>sudo firewall-cmd</code>	Shorthand
fwr	<code>sudo firewall-cmd --reload</code>	Reload current configuration
fwp	<code>sudo firewall-cmd --permanent</code>	Create permanent rule
fwrp	<code>sudo firewall-cmd --runtime-to-permanent</code>	Save current configuration

Functions

Function	Description
fwl	Lists configuration from all active zones and direct rules
