

zh-CN

传入 `okButtonProps` 和 `cancelButtonProps` 可分别自定义确定按钮和取消按钮的 props。

en-US

Passing `okButtonProps` and `cancelButtonProps` will customize the OK button and cancel button props.

```
import { Modal, Button } from 'antd';

class App extends React.Component {
  state = { visible: false };

  showModal = () => {
    this.setState({
      visible: true,
    });
  };

  handleOk = e => {
    console.log(e);
    this.setState({
      visible: false,
    });
  };

  handleCancel = e => {
    console.log(e);
    this.setState({
      visible: false,
    });
  };

  render() {
    return (
      <>
        <Button type="primary" onClick={this.showModal}>
          Open Modal with customized button props
        </Button>
        <Modal
          title="Basic Modal"
          visible={this.state.visible}
          onOk={this.handleOk}
          onCancel={this.handleCancel}
          okButtonProps={{ disabled: true }}
          cancelButtonProps={{ disabled: true }}
        >
          <p>Some contents...</p>
          <p>Some contents...</p>
          <p>Some contents...</p>
        </Modal>
      </>
    );
  }
}
```

```
        </>
    );
}

export default () => <App />;
```
