

Portfolio Starter Kit

This portfolio is built with **Next.js** and a library called [Nextra](#). It allows you to write Markdown and focus on the *content* of your portfolio. This starter includes:

- Automatically configured to handle Markdown/MDX
- Generates an RSS feed based on your posts
- A beautiful theme included out of the box
- Easily categorize posts with tags
- Fast, optimized web font loading

<https://demo.vercel.blog>

Configuration

1. Update your name in `theme.config.js` or change the footer.
2. Update your name and site URL for the RSS feed in `scripts/gen-rss.js`.
3. Update the meta tags in `pages/_document.js`.
4. Update the posts inside `pages/posts/*.md` with your own content.

Deploy your own

Deploy the example using [Vercel](#) or preview live with [StackBlitz](#)

How to use

Execute `create-next-app` with [npm](#) or [Yarn](#) to bootstrap the example:

```
npx create-next-app --example blog my-blog
# or
yarn create next-app --example blog my-blog
# or
pnpm create next-app -- --example blog my-blog
```

Deploy it to the cloud with [Vercel](#) ([Documentation](#)).
