Add a Grafana library panel to a dashboard

Add a Grafana library panel to a dashboard when you want to provide visualizations to other dashboard users.

Before you begin

- [Create a library panel]({{< relref "../library-panels/create-library-panel.md" >}}).

To add a library panel to a dashboard:

1. Hover over the + option on the left menu, then select **Create** from the drop-down options.

The **Add** panel dialog opens. {{< figure src="/static/img/docs/library-panels/add-library-panel-8-0.png" class="docs-image--no-shadow" max-width= "900px" caption="Screenshot of the edit panel" >}}

2. Click the **Add a panel from the panel library** option.

You will see a list of your library panels.

3. Filter the list or search to find the panel you want to add.
4. Click a panel to add it to the dashboard.
