

dnf plugin

This plugin makes `dnf` usage easier by adding aliases for the most common commands.

`dnf` is the new package manager for RPM-based distributions, which replaces `yum`.

To use it, add `dnf` to the plugins array in your `zshrc` file:

```
plugins=(... dnf)
```

Aliases

Alias	Command	Description
dnfl	<code>dnf list</code>	List packages
dnfli	<code>dnf list installed</code>	List installed packages
dnfgl	<code>dnf grouplist</code>	List package groups
dnfmc	<code>dnf makecache</code>	Generate metadata cache
dnfp	<code>dnf info</code>	Show package information
dnfs	<code>dnf search</code>	Search package
Use <code>sudo</code>		
dnfu	<code>sudo dnf upgrade</code>	Upgrade package
dnfi	<code>sudo dnf install</code>	Install package
dnfgi	<code>sudo dnf groupinstall</code>	Install package group
dnfr	<code>sudo dnf remove</code>	Remove package
dnfgr	<code>sudo dnf groupremove</code>	Remove package group
dnfc	<code>sudo dnf clean all</code>	Clean cache
