

## BrowserLaunchArgumentOptions interface

Launcher options that only apply to Chrome.

**Signature:**

```
export interface BrowserLaunchArgumentOptions
```

### Properties

Property	Type	Description
<a href="#">args?</a>	string[]	<i>(Optional)</i> Additional command line arguments to pass to the browser instance.
<a href="#">devtools?</a>	boolean	<i>(Optional)</i> Whether to auto-open a DevTools panel for each tab. If this is set to <code>true</code> , then <code>headless</code> will be set to <code>false</code> automatically.
<a href="#">headless?</a>	boolean	<i>(Optional)</i> Whether to run the browser in headless mode.
<a href="#">userDataDir?</a>	string	<i>(Optional)</i> Path to a user data directory. <a href="#">see the Chromium docs</a> for more info.
