

API routes with REST

Next.js ships with [API routes](#) which provide an easy solution to build your own `API`. This example shows how it can be used to create your [REST](#) `API`.

Deploy your own

Deploy the example using [Vercel](#) or preview live with [StackBlitz](#)

How to use

Execute `create-next-app` with [npm](#) or [Yarn](#) to bootstrap the example:

```
npx create-next-app --example api-routes-rest api-routes-rest-app
# or
yarn create next-app --example api-routes-rest api-routes-rest-app
# or
pnpm create next-app -- --example api-routes-rest api-routes-rest-app
```

Deploy to Vercel

Deploy it to the cloud with [Vercel](#) ([Documentation](#)).
