${\rm Home} > {\rm puppeteer} > {\rm PuppeteerNodeLaunchOptions}$

$PuppeteerNodeLaunchOptions\ type$

Utility type exposed to enable users to define options that can be passed to puppeteer.launch without having to list the set of all types.

Signature:

 $\label{eq:constraint} \begin{tabular}{ll} export declare type PuppeteerNodeLaunchOptions = BrowserLaunchArgumentOptions & LaunchOptions \\ References: BrowserLaunchArgumentOptions, LaunchOptions, BrowserConnectOptions \\ \end{tabular}$
