This page contains links to some examples of existing binding.gyp files that other node modules are using. Take a look at them for inspiration.

To add to this page, just add the link to the project's binding.gyp file below:

- ons
- thmclrx
- <u>libxmljs</u>
- <u>node-buffertools</u>
- <u>node-canvas</u>
- <u>node-ffi</u> + <u>libffi</u>
- <u>node-time</u>
- <u>node-sass</u> + <u>libsass</u>
- node-serialport
- <u>node-weak</u>
- pty.js
- <u>ref</u>
- <u>appjs</u>
- <u>nwm</u>
- <u>bcrypt</u>
- <u>nk-mysql</u>
- nk-xrm-installer + includable.gypi + unpack.py + disburse.py .py files above provide complete reference for examples of fetching source via http, extracting, and moving files.
- node-memwatch
- node-ip2location
- node-midi
- <u>node-sqlite3</u> + <u>libsqlite3</u>
- <u>node-zipfile</u>
- node-mapnik
- <u>node-inotify</u>
- <u>v8-profiler</u>
- <u>airtunes</u>
- node-fann
- node-talib
- <u>node-leveldown</u> + <u>leveldb.gyp</u> + <u>snappy.gyp</u>
- <u>node-expat</u> + <u>libexpat</u>
- <u>node-openvg-canvas</u> + <u>node-openvg</u>
- node-cryptopp
- topcube
- <u>node-osmium</u>
- <u>node-osrm</u>
- node-oracle
- node-process-list
- <u>node-nanomsg</u>
- Ghostscript4JS
- <u>nodecv</u>
- magick-cli
- sharp
- <u>krb5</u>
- <u>node-heapdump</u>
