Graph time series as points

This section explains how to use Time series field options to visualize time series data as points and illustrates what the options do.

Create the panel

- 1. [Add a panel]({{< relref "../../panels/working-with-panels/add-panel.md" >}}). Select the [Time series]({{< relref "_index.md" >}}) visualization.
- 2. In the Panel editor side pane, click **Graph styles** to expand it.
- 3. In Style, click Points.

Style the points

Use the following field settings to refine your visualization.

Some field options will not affect the visualization until you click outside of the field option box you are editing or press Enter.

Point size

Set the size of the points, from 1 to 40 pixels in diameter.

Point size set to 6:

Point size set to 20:

Point size set to 35:
