ioctl VIDIOC STREAMON, VIDIOC STREAMOFF

System Message: ERROR/3 (D:\onboarding-resources\sample-onboarding-resources\linux-master\Documentation\userspace-api\media\v41\[linux-master] [Documentation] [userspace-api] [media] [v41] vidioc-streamon.rst, line 2)

Unknown directive type "c:namespace".

.. c:namespace:: V4L

Name

VIDIOC_STREAMON - VIDIOC_STREAMOFF - Start or stop streaming I/O

Synopsis

System Message: ERROR/3 (D:\onboarding-resources\sample-onboarding-resources\linux-master\Documentation\userspace-api\media\v41\[linux-master] [Documentation] [userspace-api] [media] [v41]vidioc-streamon.rst, line 18)

Unknown directive type "c:macro".

.. c:macro:: VIDIOC_STREAMON

int ioctl(int fd, VIDIOC STREAMON, const int *argp)

System Message: ERROR/3 (D:\onboarding-resources\sample-onboarding-resources\linux-master\Documentation\userspace-api\media\v41\[linux-master] [Documentation] [userspace-api] [media] [v41]vidioc-streamon.rst, line 22)

Unknown directive type "c:macro".

.. c:macro:: VIDIOC STREAMOFF

int ioctl(int fd, VIDIOC STREAMOFF, const int *argp)

Arguments

fd

File descriptor returned by :c:func:'open()'.

System Message: ERROR/3 (D:\onboarding-resources\sample-onboarding-resources\linux-master\Documentation\userspace-api\media\v41\[linux-master] [Documentation] [userspace-api] [media] [v41] vidioc-streamon.rst, line 30); backlink

Unknown interpreted text role "c:func".

argp

Pointer to an integer.

Description

System Message: ERROR/3 (D:\onboarding-resources\sample-onboarding-resources\linux-master\Documentation\userspace-api\media\v41\[linux-master] [Documentation] [userspace-api] [media] [v41] vidioc-streamon.rst, line 38); backlink

Capture hardware is disabled and no input buffers are filled (if there are any empty buffers in the incoming queue) until VIDIOC_STREAMON has been called. Output hardware is disabled and no video signal is produced until VIDIOC_STREAMON has been called. The ioctl will succeed when at least one output buffer is in the incoming queue.

Memory-to-memory devices will not start until VIDIOC STREAMON has been called for both the capture and output stream types.

If VIDIOC STREAMON fails then any already queued buffers will remain queued.

The VIDIOC_STREAMOFF loctl, apart of aborting or finishing any DMA in progress, unlocks any user pointer buffers locked in physical memory, and it removes all buffers from the incoming and outgoing queues. That means all images captured but not dequeued yet will be lost, likewise all images enqueued for output but not transmitted yet. I/O returns to the same state as after calling ref. VIDIOC REQBUFS and can be restarted accordingly.

System Message: ERROR/3 (D:\onboarding-resources\sample-onboarding-resources\linux-master\Documentation\userspace-api\media\v41\[linux-master] [Documentation] [userspace-api] [media] [v41] vidioc-streamon.rst, line 55); backlink

Unknown interpreted text role 'ref'.

If buffers have been queued with ref: VIDIOC_QBUF` and VIDIOC_STREAMOFF is called without ever having called VIDIOC_STREAMON, then those queued buffers will also be removed from the incoming queue and all are returned to the same state as after calling ref: VIDIOC_REQBUFS` and can be restarted accordingly.

System Message: ERROR/3 (D:\onboarding-resources\sample-onboarding-resources\linux-master\Documentation\userspace-api\media\v41\[linux-master] [Documentation] [userspace-api] [media] [v41] vidioc-streamon.rst, line 64); backlink

System Message: ERROR/3 (D:\onboarding-resources\sample-onboarding-resources\linux-master\Documentation\userspace-api\media\v41\[linux-master] [Documentation] [userspace-api] [media] [v41] vidioc-streamon.rst, line 64); backlink

Unknown interpreted text role 'ref'.

Both ioctls take a pointer to an integer, the desired buffer or stream type. This is the same as struct :c.type:'v412_requestbuffers' type.

System Message: ERROR/3 (D:\onboarding-resources\sample-onboarding-resources\linux-master\Documentation\userspace-api\media\v41\[linux-master] [Documentation] [userspace-api] [media] [v41] vidioc-streamon.rst, line 71); backlink

Unknown interpreted text role "c:type".

If ${\tt VIDIOC_STREAMON}$ is called when streaming is already in progress, or if ${\tt VIDIOC_STREAMOFF}$ is called when streaming is already stopped, then 0 is returned. Nothing happens in the case of ${\tt VIDIOC_STREAMON}$, but ${\tt VIDIOC_STREAMOFF}$ will return queued buffers to their starting state as mentioned above.

Note

Applications can be preempted for unknown periods right before or after the <code>VIDIOC_STREAMON</code> or <code>VIDIOC_STREAMOFF</code> calls, there is no notion of starting or stopping "now". Buffer timestamps can be used to synchronize with other events.

Return Value

On success 0 is returned, on error -1 and the errno variable is set appropriately. The generic error codes are described at the ref. Generic Error Codes <gen-errors>` chapter.

Unknown interpreted text role 'ref'.

EINVAL

The buffer type is not supported, or no buffers have been allocated (memory mapping) or enqueued (output) yet.

EPIPE

The driver implements ref: pad-level format configuration <pad-level-formats>` and the pipeline configuration is invalid.

System Message: ERROR/3 (D:\onboarding-resources\sample-onboarding-resources\linux-master\Documentation\userspace-api\media\v41\[linux-master] [Documentation] [userspace-api] [media] [v41] vidioc-streamon.rst, line 100); backlink

Unknown interpreted text role 'ref'.

ENOLINK

The driver implements Media Controller interface and the pipeline link configuration is invalid.
